# Bowel cancer screening

**Photosymbols®**

Professional Licence 708499177527

Our body is made of tiny parts called cells.

When cells go bad this is called cancer.

You can get cancer in different parts of your body.

If cancer is not treated by a doctor in time people can get very sick or die.

**Symptoms can be like –**

- Losing weight very fast for no reason
- Tired all the time
- Blood in your poo
- A lump that you can feel on your body

Bowel Cancer screening is offered to anyone above the age of 60 up to the age of 74.

Bowel is inside your body and connects the stomach to the bottom.

Bowel takes away any waste from your body and that waste is called poo.

NHS offers tests to help find cancer sooner.

- This is called the **National Cancer Screening Programme.**

The test kit is sent directly to your home.

You will be asked to do the test every 2 years up to the age of 75.

Do not wait for your Cancer Screening appointment if you think you have cancer symptoms.

Take cancer seriously and get help as soon as you can!
